

HSM PF 600

The high-performance HSM perforators perforate PET bottles prior to being compressed. In the compression that follows, this pre-processing of the material ensures optimum compact bales. The perforators HSM PET PF 600-4 and PF 1200-4 have very high throughput capacities with excellent price/performance ratios and complete the HSM range of disposal systems.

Technical data

Order number:	1776000	Working width2:	600 mm
Throughput per hour PET bottles (1 litre):	37500	Dimensions of machine (WxDxH)2:	990 x 1200 x 500 mm
Driving power:	6 kW		

Product Information:

Throughput per hour up to 37 500 PET bottles (1 litre)

Ideal as an option for the HSM VK- / AK channel baling presses or alternatively as an independent system

Applicable for all systems using underframe and hopper with conveyor-belt, also possible for retrofitting to existing systems

Product Information:

Perforation of empty and/or full plastic bottles (max. approx. 2.5 litre) is possible, with or without caps

Perforation of the plastic bottles achieves optimum compression for reduced transport and storage costs

Sturdy cutting unit – will handle the occasional glass bottle

Perforator may be mounted in a loading chute, moved manually or automatically / hydraulically to allow compression of alternative materials which do not need perforation
