

HSM HL 4812

The HSM HL 4812 has been designed with an operating concept and technical features in mind to make it the optimum machine for food retailers and small central storage facilities. It can be fed manually or via conveyor. Bale ejection is handled by the machine efficiently and safely with minimum operator effort. All in all a sophisticated solution for small to medium quantities at a great price-performance ratio and high automation level.

Technical data

Order number:	6402000	Pressing power²:	480 kN
Bale weight:	420 x 420 kg	Dimensions of machine (WxDxH)²:	5158 x 1642 x 2550 mm
Loading aperture (WxH):	1020 x 1250 mm		

Product Information:

Very low space requirement thanks to compact and sturdy design

Manual bale strapping with wire

Intuitive, multilingual operational guidance via graphic description

Product Information:

Pallet locking mechanism for safe bale removal
