

Thank you

10 years in action for rainforest protection in Guatemala „land of trees“

The tropical rainforests of Guatemala are a true treasure chest of nature: rare and endangered species such as the bright red macaw, howler monkeys, Quetzal oder jaguar are still living here. **HSM GmbH & Co. KG** is supporting the protection of this precious habitats since 2008. Today, we work in three nature reserves with more than 466.000 ha and make a valuable contribution to species and climate protection.

Thank you very much!
